Nuclear Black Markets Nov 05 2021 "The arrest and public confession of Pakistani nuclear weapons scientist Abdul Qadeer Khan in 2004 revealed the existence of a global proliferation network which had, over almost two decades, provided nuclear technology, expertise, and designs to Iran, North Korea, Libya and possibly other countries. Khan was not the only nuclear arms merchant and Pakistan was not the only country implicated in his shadowy network. It spanned three continents and eluded both national and international systems of export controls that had been designed to prevent illicit trade. The discovery of the network highlighted concerns that nuclear technology is no longer the monopoly of industrially advanced countries, but can be purchased off-the-shelf by both states and terrorist groups. The IISS Strategic Dossier on nuclear black markets provides a comprehensive assessment of the Pakistani nuclear programme from which the Khan network emerged, the network's onward proliferation activities, and the illicit trade in fissile materials. In addition, the Strategic Dossier provides an overview of the clandestine nuclear procurement activities of other states, along with the efforts made both by Pakistan and the international community to prevent the reoccurrence of further proliferation networks and to secure nuclear technology. The final chapter assesses policy options for further action.

Cooperative Innovation: Science And Technology Policy Aug 22 2020 Research cooperation in a nation is a fundamental key to national competitiveness in technology that supports growth in a national economy. To fully understand why some nations are more successful in innovation than others, one must examine the structure and process of knowledge creation and use — the Science & Technology policy of a nation. National innovation requires progress both in Science & Technology, and also in economy. Research cooperation for innovation is necessary, since science, technology, and production are performed in different sectors of a nation. Universities conduct research science, and science discovers nature. Governments support most of the research in universities, and therefore are the principal sponsors of

science. Industry develops most technology and commercializes technology into economically useful products/services. The structure and process of knowledge in a nation thus requires (1) creation of knowledge in science, (2) translation of science into technology, and (3) design of technology into commercialization of utility. At a national level, innovation is thus a complicated concept — proposing a need to identify the proper ways that government-university-industry can cooperate to advance knowledge and economically benefit from innovation. Special programs in Science & Technology policy that have proven beneficial in fostering research cooperation for national competitiveness will be covered in this book. Cooperative Innovation: Science & Technology Policy helps readers understand a practical science & technology policy for a nation. Its contents are particularly useful for government administrators of research, industrial research directors, university research directors, and students of science & technology policy.

The Nixon Conspiracy Feb 08 2022 Geoff Shepard's shocking exposé of corrupt collusion between prosecutors, judges, and congressional staff to void Nixon's 1972 landslide reelection. Their success changed the course of American history. Geoff Shepard had a ringside seat to the unfolding Watergate debacle. As the youngest lawyer on Richard Nixon's staff, he personally transcribed the Oval Office tape in which Nixon appeared to authorize getting the CIA to interfere with the ongoing FBI investigation, and even coined the phrase "the smoking gun." Like many others, the idealistic Shepard was deeply disappointed in the president. But as time went on, the meticulous lawyer was nagged by the persistent sense that something wasn't right with the case against Nixon. The Nixon Conspiracy is a detailed and definitive account of the Watergate prosecutors' internal documents uncovered after years of painstaking research in previously sealed archives. Shepard reveals the untold story of how a flawed but honorable president was needlessly brought down by a corrupt, deep state, big media alliance—a circumstance that looks all too familiar today. In this hard-hitting exposé, Shepard reveals the real smoking gun: the prosecutors' secret, but erroneous, "Road Map" which caused grand jurors to name Nixon a co-conspirator in the Watergate cover-up and the House Judiciary Committee to adopt its primary Article of Impeachment. Shepard's startling conclusion is that Nixon didn't actually have to resign. The proof of his good faith is right there on the tapes. Instead, he should have taken his case to a Senate impeachment trial—where, if everything we know now had come out—he would easily have won.

Critical Infrastructure Protection in Homeland Security Sep 22 2020 Covers critical infrastructure protection, providing a rigorous treatment of risk, resilience, complex adaptive systems, and sector dependence Wide in scope, this classroom-tested book is the only one to emphasize a scientific approach to protecting the key infrastructures components of a nation. It analyzes the complex network of entities that make up a nation's infrastructure, and identifies vulnerabilities and risks in various sectors by combining network science, complexity theory, risk analysis, and modeling and simulation. This approach reduces the complex problem of protecting water supplies, energy pipelines, telecommunication stations, power grid, and Internet and Web networks to a much simpler problem of protecting a few critical nodes. The new third edition of Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation incorporates a broader selection of ideas and sectors than the previous book. Divided into three sections, the first part looks at the historical origins of homeland security and critical infrastructure, and emphasizes current policy. The second examines theory and foundations, highlighting risk and resilience in the context of complexity theory, network science, and the prevailing theories of catastrophe. The last part covers the individual sectors, including communications, internet, cyber threats, information technology, social networks, SCADA, water and water treatment, energy, and more. Covers theories of catastrophes, details of how sectors work, and how to deal with the problem of critical infrastructure protection's enormity and complexity Places great emphasis on computer security and whole-community response Includes PowerPoint slides for use by lecturers, as well as an instructor's guide with answers to exercises Offers five robust appendices that augment the non-mathematical chapters with more rigorous explanations and mathematics Critical Infrastructure Protection in Homeland Security, Third Edition is an important book for upper-division undergraduates and first-year graduate students in political science, history, public administration, and computer technology. It will also be of great interest to professional security experts and policymakers.

The Penguin History of Modern Vietnam Oct 24 2020 WINNER OF THE AMERICAN HISTORICAL ASSOCIATION'S JOHN K. FAIRBANK PRIZE SHORTLISTED FOR THE CUNDHILL HISTORY PRIZE 2017 'This is the finest single-volume history of Vietnam in English. It challenges myths, and raises questions about the socialist republic's political future' Guardian 'Powerful and compelling. Vietnam will be of growing importance in the twenty-first-century world, particularly as China and the US rethink their roles in Asia. Christopher Goscha's book is a brilliant account of that country's history.' - Rana Mitter 'A vigorous, eye-opening account of a country of great importance to the world, past and future' - Kirkus Reviews Over the centuries the Vietnamese have been both colonizers themselves and the victims of colonization by others. Their country expanded, shrunk, split and sometimes disappeared, often under circumstances far beyond their control. Despite these often overwhelming pressures, Vietnam has survived as one of Asia's most striking and complex cultures. As more and more visitors come to this extraordinary country, there has been for some years a need for a major history - a book which allows the outsider to understand the many layers left by earlier emperors, rebels, priests and colonizers. Christopher Goscha's new work amply fills this role. Drawing on a lifetime of thinking about Indo-China, he has created a narrative which is consistently seen from 'inside' Vietnam but never loses sight of the connections to the 'outside'. As wave after wave of invaders - whether Chinese, French, Japanese or American - have been ultimately expelled, we see the terrible cost to the Vietnamese themselves. Vietnam's role in one of the Cold War's longest conflicts has meant that its past has been endlessly abused for propaganda purposes and it is perhaps only now that the events which created the modern state can be seen from a truly historical perspective. Christopher Goscha draws on the latest research and discoveries in Vietnamese, French and English. His book is a major achievement, describing both the grand narrative of Vietnam's story but also the byways, curiosities, differences, cultures and peoples that have done so much over the centuries to define the many versions of Vietnam.

The Four Intelligences of the Business Mind Jul 01 2021 "Valeh Nazemoff recommends leaders apply what she calls 'mastermind intelligence' to find strategy sweet spots by being smart about financial, customer and business data."—Sonja Carberry, "Keep Business Strategy in Motion to Stay Competitive," Investor's Business Daily, Jan. 8, 2015 "It takes a lot of smarts to run a business, but not just any smarts. Four specific mental skills or 'intelligences' will help make any entrepreneur more successful, according to Valeh Nazemoff." —Minda Zetlin, "4 Mental Skills Every Business Leader Needs," Inc., Dec. 24, 2014 "Nazemoff offers a framework to help business leaders sort through the endless barrage of data and make decisions effectively...ultimately helping business transform and grow to where you want it to be." —Nicole Fallon, Business News Daily, Dec. 17, 2014 "I highly recommend that you look at your organization through the lens of The Four Intelligences of the Business Mind. If you do so, your business will improve in unexpected ways." —Mark Waldman, Executive MBA Faculty, Loyola Marymount University "The Four Intelligences of the Business Mind uses a revolutionary four-quadrant-based approach to teach you how to retrain your brain to optimize and transform your business. Valeh Nazemoff has written an excellent book with a

commonsense approach and clear guidance." —Shaun Khalfan, Chief of Cyber Infrastructure, Department of the Navy A new pragmatic synthesis of organizational psychology, business analytics, and multiple intelligences theory, The Four Intelligences of the Business Mind lays out a scheme of four discrete but interlocking types of intelligence essential to business success. These intelligences are scalable and transferable from the individual leader to the organizational ecosystem. This short book teaches executives first to analyze and train their own brains in these four intelligences; then to transform their organizations by applying their sharpened quadruplex intelligence to their business analyses and decisions; and finally to train and incentivize their companies to map onto a collective organizational scale the mental transformation modeled by the "mastermind" leader. The four essential business intelligences identified by IT executive and organizational psychologist Valeh Nazemoff are financial intelligence, customer intelligence, data intelligence, and mastermind intelligence. Financial intelligence informs your ability to reinvest and regrow your business boldly but prudently in the light of predictive, risk, and business analytics. Customer intelligence informs your ability to rethink your approaches to attracting and keeping customers using customer, web, mobile, social, big data, and behavioral analytics. Data intelligence informs your ability to reinvent and recreate information in automated graphical representations to enable rapid decision-making using visual, cloud, web, and operational analytics, AI, and distance collaboration platforms. Finally, mastermind intelligence involves your ability through leadership and team exercises to impart to your employees and organization the same transformative honing and integration of business intelligences as you have undergone yourself. "Practical, relevant, insightful, engaging, and a pleasant read, The Four Intelligences of the Business Mind puts human decision making into a whole new light, revealing practical steps that will allow you to reinvent your business and customer relationships!" —James Brady, PhD, FHIMSS, Chief Information Officer, Kaiser Permanente Orange County "An invaluable book that shows you how to harness the inevitable transformations in business by understanding your mind better." —Alan Komet, Vice President, Global Sales Operations, FalconStor Software, Inc. "A must-read book for every business person." —Chuck Corjay, Ret. Chairman, AFCEA International "Valeh Nazemoff has written an intelligent, thoughtful book full of insight and practical advice. The Four Intelligences of the Business Mind reframes the way our minds work, and in doing so transforms how we drive business forward. This book is a must-read!" —Joe DiStefano, Senior Vice President and Market Executive, Cardinal Bank

The Road Map to Nowhere Oct 16 2022 An urgent and searing expose of the "peace process" by a prominent Israeli thinker.

State of Failure Nov 24 2020 The biggest obstacle to Palestinian statehood may not be Israel In September 2011, president Mahmoud Abbas stood before the United Nations General Assembly and dramatically announced his intention to achieve recognition of Palestinian statehood. The United States roundly opposed the move then, but two years later, Washington revived dreams for Palestinian statehood through bilateral

diplomacy with Israel. But are the Palestinians prepared for the next step? In *State of Failure*, Middle East expert Jonathan Schanzer argues that the reasons behind Palestine's inertia are far more complex than we realize. Despite broad international support, Palestinian independence is stalling because of internal mismanagement, not necessarily because of Israeli intransigence. Drawing on exclusive sources, the author shows how the PLO under Yasser Arafat was ill prepared for the task of statebuilding. Arafat's successor, Mahmoud Abbas, used President George W. Bush's support to catapult himself into the presidency. But the aging leader, now four years past the end of his elected term, has not only failed to implement much needed reforms but huge sums of international aid continue to be squandered, and the Palestinian people stand to lose everything as a result. Supporters of Palestine and Israel alike will find Schanzer's narrative compelling at this critical juncture in Middle Eastern politics.

Der Weg zum persönlichen Erfolg - Die Mental-Dynamite-Serie Nov 17 2022 1941 von Napoleon Hill geschrieben, ist dieses Buch eine kraftvolle Roadmap, die zu einer einzigen Entdeckung führt: Jeder von uns hat bereits die Kraft, jeden Reichtum, Erfolg und Wohlstand zu erreichen, den er sich im Leben wünscht. Alles, was man tun muss, ist, den Weg zu gehen, ohne sich allzu sehr ablenken zu lassen, und der Rest wird folgen. In drei leicht verdaulichen Lektionen, die jeweils ein eigenes Kapitel umfassen, offenbart Napoleon Hill wie das Bezwingen mangelnder Zielstrebigkeit, das Meistern des eigenen Verstandes und das Beschreiten der Extra-Meile unweigerlich den Weg zum persönlichen Erfolg bedeuten.

Myanmar's Political Transition and Lost Opportunities (2010-2016) Apr 29 2021 This book is about the politics of Myanmar under the reformist president Thein Sein. After taking office in March 2011, Thein Sein initiated the bloodless Myanmar Spring. He was able to transform Myanmar into a more transparent and dynamic society, bring Aung San Suu Kyi and other opposition activists into the political process, initiate a peace process with the ethnic armed organizations, reintegrate Myanmar into the international community after five decades of isolation, and, most importantly, for the first time since the country regained independence in 1948, he was able to enact the peaceful transfer of power from one elected government to another. But Thein Sein also lost opportunities to deliver what the people anticipated, and he failed to bring his USDP party to victory in the 2015 election. This book is not about the successes of the Thein Sein administration. Rather, it examines the reasons behind the lost opportunities in the transition to democracy. It draws on the author's experiences as a member of Thein Sein's cabinet as well as on extensive interviews with other cabinet members and politicians involved in the crucial events that took place between 2010 and 2016. The book is a must-read for anyone interested in this critical period of change for Myanmar.
