Handwriting Analysis: Laws/Principles... And More is Mr. Cammarata's presentation of handwriting's inherent scientific base from which handwriting is analyzed. Like any other scientific study, handwriting is based upon inescapable laws/elements/principles which are exhibited each time a person writes. These form the stable rock of its foundation. Part of that rock is the only two possible movements when writing. These movements are stated with instant proof. No different than any other science, handwriting's silent but dynamic portrayal of personality is a wonderment of human analytical and historical development. Handwriting is actually brain writing. By assessing the permanent inescapable elements, a personality can be traced just like the infamous duck tracks. Besides describing the elements/principles/laws, original concepts of handwriting will be presented. A 20-year study to determine the very necessary average standard size for writing is given with statistics and insight into the power of handwriting. A presentation is made implying handwriting's reality source base. Further, the generally accepted copybook "standard" writing size is challenged with various arguments. The process of personnel selection (before hiring) is also presented and much to the employer's advantage. It's the personality that DOES the job, not experience nor education. Yes, the latter help but they do not DO the job. Only the inherent qualities matched to the job description can produce a known performance level prior to hiring. This book is an inspiration to the understanding of handwriting's foundation scientific base and why handwriting analysis is real and works. Forget about what you may have learned or heard of previously. This book gives you the truth about handwriting. You'll be surprised and totally engaged in this most fascinating true presentation. ihm 1885 eine Tochter. Nach der Geburt hat Charlotte Perkins Gilman tiefe Depressionen. Ein Spezialist in Philadelphia verordnet ihr eine Ruhekur, bei der jegliche geistige Anstrengung eingeschränkt und das Schreiben untersagt ist. Durch diese Kur fühlt sie sich so zerrüttet, dass sie ihre Familie verlässt und zu einer Freundin nach Pasadena in Kalifornien flieht. 1892 veröffentlicht sie mit "Die gelbe Tapete" ihre erste Kurzgeschichte, die auf den Erfahrungen aus der Zeit ihrer Nervenkrise basiert. Die Veröffentlichung führt zu heftigen Reaktionen. "Die gelbe Tapete" gilt bis heute als literarisches Meisterwerk. Nach Charlotte Perkins Gilman 1934 an Brustkrebs erkrankt war, nahm sie sich ein Jahr später, mittels einer Überdosis Chloroform, das Leben.
