Instead, it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker. Knowledge & Discourse Oct 24 2020 Knowledge and Discourse presents an ecological approach to the study of discourse in social, academic and professional practices. It brings together distinguished scholars from diverse cultures - India, China, Australia, Canada among others - and disciplines - linguistics, anthropology, sociology, philosophy. The chapters collectively illustrate the ecological approach by exploring how language makes connections between subjective experiences as people construct meaning and action. This book offers the reader a holistic, interdisciplinary approach to the study of language as discourse, questioning traditional views of disciplinary knowledge and the role of discourse in the pursuit, construction and compartmentalisation of such knowledge. Through the variety of disciplines, experiences and approaches, the contributors show how the world and word are contingent on each other. The notions of connectivity, contingency and change are themes that run through the book, and in the interweaving of these themes readers will find persuasive illustrations of an ecological approach to applied linguistics.

Greek Pedagogy in Crisis Jul 21 2020 The goal of every pastor, missionary, and lay leader in the evangelical church is to proclaim the word of God accurately. And, one of the key components of accurate biblical interpretation is the understanding of the Bible's original languages. While some Bible teachers forego learning Hebrew and Greek altogether, many men and women seek their language training by buying books to study on their own, others look for free online courses and videos to provide this instruction, while still others commit to formal theological training through higher education. Each of those language-learning formats (print, digital, and guided) are effective educational tools, but the problem is that each of those formats are primarily based on the same, antiquated teaching method. This book analyzes and assesses the current biblical language pedagogy from the vantage point of over thirty prominent professionals in the field of New Testament Greek. Their insight provides some of the first formal data on the usefulness and effectiveness of the Grammar-Translation Method for teaching biblical languages today. Additionally, this book will introduce a unique and cutting-edge approach to the process of teaching and learning the original languages of the word of

God.

Up until recently, the study of second language teacher education has focused mainly on the knowledge base and specific skills needed for effective teaching. This book invites us to look at teacher education from a fresh point of view, through an exploration of the thinking and learning processes of individuals as they learn to teach. Seventeen original articles, based on studies done in North America, Europe, Asia, and Australia, provide examples of pioneering research into the ways that individuals learn to teach languages, and the roles that previous experience, social context, and professional training play in the process. The collection thus helps establish a research base for this newly developing field.

On the Borders of Convention Nov 05 2021 The research presented in this book is authored by scholars coming from as distant regions as South Africa, the United States of America, Great Britain, France, Italy, Belarus, the Balkans. Needless to say that one of the good things about this international cooperation is that owing to their different socio-cultural backgrounds, these scholars have contributed to producing an extremely varied picture of ways of approaching the challenge of a changing world. The papers on literature and culture collected in this book contribute a further element of rigour into the discussion of numerous and always varying and changing borders of convention in a literary text, literary genre, and literary theory, as well as in general culture and everyday paths of life. Starting with oral cultures, over the classic literary masters, modernist and postmodernist textual and theoretical phenomena, the twentieth century flouting of numerous social and gender convention, through painting, film, dance, contemporary music, as well as graffiti, We have sought to stress that what is most noticeable from the evidence of their studies is that scholars today concern these issues through a dynamic global process and beyond any preconceived design, or any strict set of theoretical prescriptions, which would otherwise lead them to ignore the ever-shifting borders

in literature and culture, as well as in global socio-cultural reality in general. The variety and complexity of these essays offer fresh views to the problem posed in the title of the book. Therefore, we trust that they will stimulate intellectual confrontation and circulation of ideas within the field of literature and cultural studies.
