This book is widely regarded as one of the most remarkable achievements in Roman Law and Comparative Law scholarship this century - a fact attested to by the universal acclaim with which it has been received throughout Europe, America, and beyond. As a work of Roman Law scholarship it fuses the vast volume of 20th century scholarship on the Roman law of obligations into a clear and very readable (and in many ways original) account of the law. As a work of comparative law it traces the transformation of the Roman law of obligations over the centuries into what is now modern German, English and South African law, presenting the reader with a contrast between these legal systems which is unique both in its scope and its depth. As a whole the book is written with a deep understanding of human nature and of many social, economic, and other forces that determine the face of the law. This book provides a useful guide for researchers, reviewers, and consumers who are charged with judging the quality of qualitative studies. Viktor Emil Frankl, the founder of logotherapy, ranks amongst the twentieth century's most important researchers into the human condition. He developed a form of psychotherapy with an intriguingly dignified concept of human beings and the world which has an impressive track record of rapid success in practical application. Numerous universities around the world have honoured Frankl for his achievements. The present book provides a structured insight into his work. It explains the anthropological foundation of logotherapy and the healing concepts that are built on this foundation. Compared to other rich Western democracies, the U.S. does less to help its citizens adapt to the uncertainties of life in a market economy. In *Welfare As We Knew It*, Charles Noble offers a groundbreaking explanation of why America is so different. Drawing on research in comparative politics, history, and sociology, he demonstrates that deeply-rooted political factors, not public opinion, have limited what reformers have been able to accomplish. Rich historical analysis covering the Wilson administration to the present is followed by a provocative look at future U. S. social policy. Reformers who want government to do more, Noble argues, must refocus their activities on political and institutional change, such as campaign finance and labor-law reform, if they hope to succeed. Taut, comprehensive, and accessible, with a much-needed international perspective, this book will change the way we look at U. S. social policy. This provocative and challenging book argues for the vital importance of critical self-reflexion in the field of adaptive physical activity (APA). It makes a powerful case for embracing discussions of the harm caused by ableist assumptions of the ideal body, maximizing capabilities and perfecting normative based movement that dominate contemporary discourse in APA, and calls for more critical introspection about what APA is, how it is performed, and what might be needed to bring a collaborative relational ethic to this field. This book focuses on two key themes: Firstly, how ableism as a foundational belief system of APA is present in the undergraduate curriculum, professional preparation, professional practice, and organizational policies. Secondly, how to make the comfortable uncomfortable by openly debating the harm that results from non-reflexive (nondisabled) hubris in APA. The goal is to spark an exchange of ideas among scholars, practitioners, and organizational leaders and therefore to shift the paradigm from one of professional

expertise to one that centres disability wisdom holders, bringing a fundamental change to how we perform adaptive physical activity. This book is important, progressive reading for anybody with an interest in adaptive physical activity, adapted physical education, disability sport, inclusive education, the philosophy and ethics of disability and sport, or disability in wider society. A complete reference to the fields of psychology and behavioral science Volume 4 is the final volume in The Corsini Encyclopedia of Psychology and Behavioral Science series. Providing psychologists, teachers, researchers, and students with complete reference for over 1,200 topics across four volumes, this resource is invaluable for both clinical and research settings. Coverage includes conditions, assessments, scales, diagnoses, treatments, and more, including biographies on psychologists of note and psychological organizations from across the globe. The Third Edition has been updated to reflect the growing impact of neuroscience and biomedical research, providing a highly relevant reference for the highest standard of care. Provides a practical approach to leadership and management principles specific to clinical settings. Coverage includes clinical decision-making, technology to improve patient outcomes, and leadership and management practice in inter-professional healthcare delivery. Multiple case studies. This textbook is intended for students preparing as advanced practice nurses, doctoral physical therapists, doctoral pharmacists, and other advanced practice professionals. The book provides practical approaches to the application of leadership and management principles while systematically presenting the content needed for skilled leadership in varied clinical settings. Chapters are devoted to leadership change, understanding health organizations and systems, technology to improve population-based care, using critical thinking principles to improve patient outcomes, clinical decision-making using evidence-based practice, and inter-professional healthcare delivery. Telehealth and the impacts of the Affordable Care Act are also discussed. A case study is presented at the beginning of each chapter and incorporated into the theoretical material as a continuing illustration. This unique volume introduces and discusses the methods of validating computer simulations in scientific research. The core concepts, strategies, and techniques of validation are explained by an international team of pre-eminent authorities, drawing on expertise from various fields ranging from engineering and the physical sciences to the social sciences and history. The work also offers new and original philosophical perspectives on the validation of simulations. Topics and features: introduces the fundamental concepts and principles related to the validation of computer simulations, and examines philosophical frameworks for thinking about validation; provides an overview of the various strategies and techniques available for validating simulations, as well as the preparatory steps that have to be taken prior to validation; describes commonly used reference points and mathematical frameworks applicable to simulation validation; reviews the legal prescriptions, and the administrative and procedural activities related to simulation validation; presents examples of best practice that demonstrate how methods of validation are applied in various disciplines and with different types of simulation models; covers important practical challenges faced by simulation scientists when applying validation methods and techniques; offers a selection of general philosophical reflections that explore the significance of validation from a broader perspective. This truly interdisciplinary handbook will appeal to a broad audience, from professional scientists spanning all natural and social sciences, to young scholars new to research with computer simulations. Philosophers of science, and methodologists seeking to increase their understanding of simulation validation, will also find much to benefit from in the text. In *Engaging in Narrative Inquiry*, Second Edition, D. Jean Clandinin, a pioneer in narrative research, updates her classic formulation on narrative inquiry, clarifying, extending, and refining methods. This updated edition looks at changes and developments in the field since the publication of the first edition in 2013, exploring how narrative inquiry explores human lives through a narrative lens that honors experience as a source of important knowledge and understanding. The book includes several exemplary cases with the author's critique and analysis of the work. The following are new to this edition: New exemplary cases, including Menon's autobiographical narrative inquiry as the starting point for framing a research puzzle and justifying a study, Chung's account of a study that begins with living alongside participants, and a paper from Swanson's autobiographical narrative inquiry. An expanded discussion of the philosophical grounding of narrative inquiry. An expanded discussion of relational ethics in narrative inquiry that highlights links to a relational ontology. An updated account of the field of narrative inquiry that highlights future directions, including the necessity of response groups, and questions of responsibility and community. The increasing interest in narrative inquiry as research methodology across disciplines makes this book an essential guide and an excellent text for graduate courses in qualitative inquiry, education and nursing research, sociology, and all courses in autobiographical and narrative research and inquiry. Through the lens of five generations of Thaddens, this book tells the history of Trieglaff, the village and family estate located in what is now western Poland, from Napoleon's occupation in 1807 to the Red Army's invasion in 1945 and until the departure of the last Thaddens in 1948. At the center of this history of Trieglaff society, economy, politics, and culture is the von Thadden family, notably, Adolph Ferdinand von Thadden, the head of the pietistic revival in Pomerania, and Reinold von Thadden-Trieglaff, the founder of the German Protestant Kirchentag. It intertwines family history with the political history of Germany through its description of Otto von Bismarck's close associations with Trieglaff in the 19th century and its deliberation of the execution of Elisabeth von

Thadden, arising out of her resistance to the Nazis, in the 20th century. The source material is richly supplemented by family records kept by "Trieglaffers" in America and from correspondence between Pomerania and America. The book examines the lives of individuals as well as socio-economic and cultural structures, depicting the dynamic changes that the village experienced throughout some 150 years of German and European history; it might be called world history in microcosm. As juxtaposition of formal history and remembered history, it is a serious scholarly source as well as an engaging read. (Berklee Guide). Understanding Audio explores the fundamentals of audio and acoustics that impact every stage of the music recording process. Whether you are a musician setting up your first Pro Tools project studio, or you are a seasoned recording engineer or producer eager to find a reference that fills in the gaps in your understanding of audio, this book is for you. Understanding Audio will enable you to develop a thorough understanding of the underlying principles of sound, and take some of the mystery and guesswork out of how equipment setup affects the quality of your recordings. Projects at the end of each chapter will assist you in applying these principles to your own recording environment. Learn about: * Basic and advanced audio theory * Cables and studio wiring * Recording studio and console signal flow * Digital and analog audio * Studio and listening room acoustics * Psychoacoustics * "In the Studio" insights, relating audio principles to real recording situations Handbook of Studies on Depression is a collection of papers on the research and general overview of studies on depression from many countries of the world. Divided into four sections, the handbook presents an international coverage of depression, which is becoming a major worldwide clinical problem. Section I is a collection of studies in classification, phenomenology, etiology of depression, and the classification of depression and response to treatments. The genetic factors contributing to depression, effects on children, and the affective symptoms in non-western countries are described. Section II focuses on studies in the treatment of depression, examining the modes of actions of antidepressants, the use of electroconvulsive treatment, and psychosurgery for depressive illnesses. Section III moves forward to the research made on depression, including problems in clinical research, the discovery of effective antidepressant and antimanic drugs, and research into clinical psychoendocrinology, particularly on the function of the adrenal cortex in depression. Concluding this section is a paper on which depression includes a broad spectrum of psychopathology, making biological research more difficult. The last section is a discussion on the aspects of depression. Common topics examined are the management of bereavement; suicide; the side effects of tricyclic antidepressants on cardiac function; and the management of drug over dosage, especially those acts associated with depression. Psychologists, psychiatrists, medical students, school counselors, marriage guidance counselors, select members of the police force, and even parents who are interested in the subject of depression will find this handbook both useful and informative. Create, Consider, Invest It's a financial wake-up call. God is the One calling you—and He's calling collect. The good thing is, He provides the ideal model for you to follow on your way to reaping monetary rewards and gaining even more of your greatest asset on this earth: time. Carolyn Castleberry leads women through the process of creating, considering, and investing. Creating involves planning for your new life—you'll learn to take responsibility and identify a mission statement. Considering means you'll evaluate your investment options and trust the Holy Spirit. By the time you're ready to invest, you'll create a realistic budget, understand the credit game, and create an action plan for conquering debt. This book is your ticket to a new life grounded in financial freedom! A Proven Plan for Financial Success Meet your problem: • Today's volatile job market is about to take you hostage (or already has). • You suddenly have huge financial responsibilities you never had before. • Retirement looms, begging you for a plan. • Thinking about, dealing with, or strategizing anything "money" bores you, freaks you out, or makes you feel stupid. "My own financial journey began the day I realized that I didn't know anything about money. Never mind that I had a business degree and hosted a national radio show for women." —Carolyn Castleberry "A must-read for anyone who desires to find significance in life." -Kelly Wright, National network correspondent "God has always had His love and favor on women, and when we understand our role from God's perspective, we become liberated to fulfill our purpose." - Anne Beiler, Founder of Auntie Anne's, Inc. "God never said for you to be either passive or in the dark about money. Read this and get busy. You will be glad you did." -Dr. Henry Cloud, Bestselling author of the Gold Medallion Award-winning Boundaries Story Behind the Book "The day I realized I didn't know anything about money—even though I have a business degree and experience hosting a national business radio show for women—was the day I held my baby girl in my arms for the first time. I did not have a choice about whether to work or stay at home; we simply didn't have enough money. After applying this financial model, I was able to walk away from a job in television news that I had held for fourteen years. God means it when He offers us abundant life, here and eternally. This book reveals a realistic example for today's women who long to be free and have meaningful, prosperous lives." —Carolyn Castleberry Contains articles by marketing field's researchers and academicians. This book includes literature reviews, methodologies, empirical studies, trends, international developments, guidelines for implementation, and suggestions for theory development and testing. A new and updated version of this best-selling resource! Jones and Bartlett Publisher's 2011 Nurse's Drug Handbook is the most up-to-date, practical, and easy-to-use nursing drug reference! It provides: Accurate, timely facts on hundreds of

drugs from abacavir sulfate to Zytovox; Concise, consistently formatted drug entries organized alphabetically; No-nonsense writing style that speaks your language in terms you use everyday; Index of all generic, trade, and alternate drug names for quick reference. It has all the vital information you need at your fingertips: Chemical and therapeutic classes, FDA pregnancy risk category and controlled substance schedule; Indications and dosages, as well as route, onset, peak, and duration information; Incompatibilities, contraindications; interactions with drugs, food, and activities, and adverse reactions; Nursing considerations, including key patient-teaching points; Vital features include mechanism-of-action illustrations showing how drugs act at the cellular, tissue, or organ levels and dosage adjustments help individualize care for elderly patients, patients with renal impairment, and others with special needs; Warnings and precautions that keep you informed and alert. The first comprehensive history of how Jews became citizens in the modern world For all their unquestionable importance, the Holocaust and the founding of the State of Israel now loom so large in modern Jewish history that we have mostly lost sight of the fact that they are only part of—and indeed reactions to—the central event of that history: emancipation. In this book, David Sorkin seeks to reorient Jewish history by offering the first comprehensive account in any language of the process by which Jews became citizens with civil and political rights in the modern world. Ranging from the mid-sixteenth century to the beginning of the twenty-first, Jewish Emancipation tells the ongoing story of how Jews have gained, kept, lost, and recovered rights in Europe, North Africa, the Middle East, the United States, and Israel. Emancipation, Sorkin shows, was not a one-time or linear event that began with the Enlightenment or French Revolution and culminated with Jews' acquisition of rights in Central Europe in 1867–71 or Russia in 1917. Rather, emancipation was and is a complex, multidirectional, and ambiguous process characterized by deflections and reversals, defeats and successes, triumphs and tragedies. For example, American Jews mobilized twice for emancipation: in the nineteenth century for political rights, and in the twentieth for lost civil rights. Similarly, Israel itself has struggled from the start to institute equality among its heterogeneous citizens. By telling the story of this foundational but neglected event, Jewish Emancipation reveals the lost contours of Jewish history over the past half millennium. The medical care structures in Germany are the result of a needs-planning and control in the outpatient and inpatient service provision. Good access, distribution optimization as well as high quality of medical services should be attributes which guarantee a future-oriented needbased health care to the population. But the health care system in Germany is characterized by serious allocation problems. This is particularly evident between rural and urban regions as well as between federal states. In the area of outpatient care, the legislators intervened by passing the GKV Health Care Enhancing Law (GKV-VSG). The concerned federal states are responsible for balancing out the care differences in the inpatient area. Internists for hematology/oncology are taking up malignant new strains, known in common parlance as cancer. Their number increased between 2010 and 2014 by 11.7 %. The increasing incidence and prevalence rates are the possible drivers of this development. Stronger in the outpatient statutory health care than in inpatient service provision. Some federal states recorded an increase in this area while other states registered a decrease. What is interesting here is: federal states with less poverty in which household assets are distributed unequally, employ a bigger number of internists for hematology/oncology than others. This unequal development is not without its consequences. Besides age and gender-specific differences in mortality from malignant new strains, the richer federal states tend to have lower mortality rates. The present thesis generates initial results on whether the (regional) development of internists for hematology/oncology could play a role in determining mortality in case of malignant diseases of the blood, malignant diseases of the lymph nodes and the lymphatic system as well as malignant solid tumours or their groups. Statistical methods will be used to verify or falsify the formulated hypotheses for describable and usable outcomes. Conjoint analysis is probably the most significant development in marketing research in the past few decades. It can be described as a set of techniques ideally suited to studying customers' decision-making processes and determining tradeoffs. Though this book is oriented towards methods and applications of conjoint analysis in marketing, conjoint methods are also applicable for other business and social sciences. After an introduction to the basic ideas of conjoint analysis the book describes the steps involved in designing a ratings-based conjoint study, it covers various methods for estimating partworth functions from preference ratings data, and dedicates a chapter on methods of design and analysis of conjoint-based choice experiments, where choice is measured directly. Chapter 5 describes several methods for handling a large number of attributes. Chapters 6 through 8 discuss the use of conjoint analysis for specific applications like product and service design or product line decisions, product positioning and market segmentation decisions, and pricing decisions. Chapter 9 collates miscellaneous applications of marketing mix including marketing resource allocation or store location decisions. Finally, Chapter 10 reviews more recent developments in experimental design and data analysis and presents an assessment of future developments. Ralph Waldo Emerson's life from 1826 to 1832 has a classic dramatic structure, beginning with his appointment to preach in October 1826, continuing with his courtship, his brief marriage to Ellen Tucker, and his misery after her death, and concluding with his departure from the ministry. The journals and notebooks of these years are far fewer than those in the preceding six years. Emerson noted down many ideas for sermons in his journals, but as time went on he wrote the sermons independently. Occasionally he

wrote openly about family matters, but except for the passionate response to Ellen and her death the journals tell little about the impact upon him of other people and outside events. The pattern is consistent with the earlier journals: Emerson used them mainly to record his thought, to develop and express his ideas. His religious and intellectual interests were undergoing significant changes in orientation or emphasis. He was less concerned with the existence of God than with the nature and influence of Christ. He continued to reassert the truth of Christianity, but in his growing unorthodoxy he came to show less and less sympathy with the church, with forms and ritual, with convention. And he began to wonder whether it is not the worst part of the man that is the minister. During these years, Emerson read more in Madame de Sta l, Wordsworth, G rando, and Coleridge, less in Milton, the Augustans, Dugald Stewart, and Scott. In style, he moved from a rambling, bookish rhetoric to the tautness and the cadences that mark his later Essays. First multi-year cumulation covers six years: 1965-70. Desert camping in Death Valley? Check. Glacier camping in the Sierras? Check. That's Southern California for you -- an area of staggering diversity and awesome natural beauty. With such a wide array of camping opportunities, *The Best in Tent Camping: Southern California* is an indispensable guide for bringing enthusiasts to their ideal campsite. Offering detailed profiles, at-a-glance information, campground maps, directions, and coordinates, this guide offers campers a truly comprehensive look at the best that the Golden State's southern region has to offer. The single most comprehensive resource for environmental microbiology Environmental microbiology, the study of the roles that microbes play in all planetary environments, is one of the most important areas of scientific research. *The Manual of Environmental Microbiology*, Fourth Edition, provides comprehensive coverage of this critical and growing field. Thoroughly updated and revised, the Manual is the definitive reference for information on microbes in air, water, and soil and their impact on human health and welfare. Written in accessible, clear prose, the manual covers four broad areas: general methodologies, environmental public health microbiology, microbial ecology, and biodegradation and biotransformation. This wealth of information is divided into 18 sections each containing chapters written by acknowledged topical experts from the international community. Specifically, this new edition of the Manual Contains completely new sections covering microbial risk assessment, quality control, and microbial source tracking Incorporates a summary of the latest methodologies used to study microorganisms in various environments Synthesizes the latest information on the assessment of microbial presence and microbial activity in natural and artificial environments *The Manual of Environmental Microbiology* is an essential reference for environmental microbiologists, microbial ecologists, and environmental engineers, as well as those interested in human diseases, water and wastewater treatment, and biotechnology. This money-saving package is a must-have for nursing students! It includes Huber's Leadership and Nursing Care Management 3rd edition text and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks! Red Saxony throws new light on the reciprocal relationship between political modernization and authoritarianism in Germany over the span of six decades. Election battles were fought so fiercely in Imperial Germany because they reflected two kinds of democratization. Social democratization could not be stopped, but political democratization was opposed by many members of the German bourgeoisie. Frightened by the electoral success of the Social Democrats after 1871, anti-democrats deployed many strategies that flew in the face of electoral fairness. They battled socialists, liberals, and Jews at election time, but they also strove to rewrite the electoral rules of the game. Using a regional lens to rethink older assumptions about Germany's changing political culture, this volume focuses as much on contemporary Germans' perceptions of electoral fairness as on their experiences of voting. It devotes special attention to various semi-democratic voting systems whereby a general and equal suffrage (for the Reichstag) was combined with limited and unequal ones for local and regional parliaments. For the first time, democratization at all three tiers of governance and their reciprocal effects are considered together. Although the bourgeois face of German authoritarianism was nowhere more evident than in the Kingdom of Saxony, Red Saxony illustrates how other Germans grew to fear the spectre of democracy. Although twists and turns lay ahead, that fear made it easier for Hitler and the Nazis to win elections in the 1920s and to entomb German democracy in 1933. Interest in sustainable, green building practices is greater than ever. Whether concerned about allergies, energy costs, old-growth forests, or durability and long-term value, homeowners and builders are looking for ways to ensure that their homes are healthy, safe, beautiful and efficient. In these pages are descriptions and manufacturer contact information for more than 1,400 environmentally preferable products and materials. All phases of residential construction, from sitework to flooring to renewable energy, are covered. Products are grouped by function, and each chapter begins with a discussion of key environmental considerations, and what to look for in a green product. Over 40% revised, this updated edition includes over 120 new products. Categories of products include: Sitework and landscaping Outdoor structures Decking Foundations, footers and slabs Structural systems and components Sheathing Exterior finish and trim Roofing Doors and windows Insulation Flooring and floor coverings Interior finish and trim Caulks and adhesives Paints and coatings Mechanical systems/HVAC Plumbing, electrical and lighting Appliances Furniture and furnishings Renewable energy Distributors and retailers An index of products and manufacturers makes for easy navigation. The motivation for us to conceive this work on regulation was mainly our belief that it would be fun, and at the same time productive, to approach the subject in a way that differs from that of other treatises. We thought it might be interesting and instructive-for both author and reader-to examine a particular area of investigation in a framework of many different problems. Cutting across the traditional boundaries that have separated the subjects in past volumes on regulation is not an easy thing to do-not because it is difficult to think of what interesting topics should replace the old ones, but because it is difficult to find authors who are willing to write about areas outside those pursued in their own laboratories. Anyone who takes on the task of reviewing a broad area of interest must weave together its various parts by picking up the threads from many different laboratories, and attempt to produce a fabric with a meaningful design. Finding persons who are likely to succeed in such tasks was the most difficult part of our job. In the first volume of this treatise, most of the chapters dealt with the mechanisms of regulation of gene expression in microorganisms. This second volume involves a somewhat broader area, spanning the prokaryotic-eukaryotic border. In Philanthropy, Patronage, and Civil Society, Thomas Adam has assembled a comparative set of case studies that challenge long-held and little-studied assumptions about the modern development of philanthropy. Histories of philanthropy have often neglected European patterns of giving and the importance of financial patronage to the emergence of modern industrialized societies. It has long been assumed, for example, that Germany never developed civic traditions of philanthropy as in the United States. In truth, however, 19th-century German museums, art galleries, and social housing projects were not only privately founded and supported, they were also blueprints for the creation of similar public institutions in North America. The comparative method of the essays also reveals the extent to which the wealthy classes on both sides of the Atlantic defined themselves through their philanthropic activities. Contributors are Thomas Adam, Maria Benjamin Baader, Karsten Borgmann, Tobias Brinkmann, Brett Fairbairn, Eckhardt Fuchs, David C. Hammack, Dieter Hoffmann, Simone Lässig, Margaret Eleanor Menninger, and Susannah Morris. Brent Bradford assembled a collective narrative related to the doctoral journey of recent graduates in the field of education. By explaining the role of evaluation in modern societies and its historical development in the USA and Europe this book highlights the scientific roots of Evaluation and offers an overview of its fundamental theories and concepts. The process of collecting, analyzing and interpreting is explored giving an insight into the course of an evaluation. This book explores the historical foundations of holding public authorities accountable for their acts, and discusses how and why the idea that the state should or should not be held liable became established in three significant jurisdictions. The issue of state liability for legislative acts is considered one of the most difficult and controversial problems in jurisprudence. This book analyses the development of concepts and institutions of liability for the acts of legislator pertaining to the general principles of state liability until the mid-20th century in the leading European legal systems: Germany, France and Great Britain. It is shown that, in contrast to the prevailing conviction, the lack of liability for law-making instruments was not an unassailable dogma, and that questions as to whether such liability was possible were being asked from the Middle Ages onwards. The book will be a valuable resource for academics and researchers in the areas of Constitutional Law, Public Law, History of Law, History of Legal and Political Thought, Philosophy of Law, and Comparative Legal Studies. 2003 marked the 100th anniversary of the founding of Hershey, PA. Is it even possible or desirable to establish a common identity across the diverse peoples of Southeast Asia? And how would a regional identity exist alongside national identity given the divergent memories of history? Memory in the Mekong grapples with these questions by exploring issues of shared history, national identity, and schooling in the countries along Southeast Asia's Mekong River delta: Cambodia, Thailand, Vietnam, Laos, and Myanmar" -- First Published in 2017. Routledge is an imprint of Taylor & Francis, an Informa company. The year 2014 sees the 200th anniversary of Napoleon's downfall - and the restoration of the French monarchy under the house of Bourbon. With this as a starting point, Volker Sellin shows how the European monarchies restored and prolonged their reigns by giving their countries constitutions. This new angle results in an astonishing history of the 19th century in Europe from Spain to Russia. The Basic Law, Germany's Constitution, has been frequently and substantially changed since coming into force in 1949. The fourth edition of this book consolidates the original text with all amendments up to and including the 60th Amendment of December 2014. There have been no further amendments yet. Therefore, the edition represents the current status in July 2016. The translation is part of 'International Constitutional Law' (ICL), an internet project on comparative constitutional law. The most recent update to this text can be found at www.jurisprudencia.de. Current processes of globalization are challenging Human Rights and the attempts to institutionalize them in many ways. The question of the connection between religion and human rights is a crucial point here. The genealogy of the Human Rights is still a point of controversies in the academic discussion. Nevertheless, there is consensus that the Christian tradition - especially the doctrine that each human being is an image of God - played an important role within the emergence of the codification of the Human Rights in the period of enlightenment. It is also obvious that the struggle against the politics of apartheid in South Africa was strongly supported by initiatives of churchy and other religious groups referring to the Human Rights. Christian churches and other religious groups do still play an important role in the post-apartheid South Africa. They have a public voice concerning all the challenges with which the multiethnic and economically still deeply divided South African society is faced with. The reflections on these questions in the collected lectures and essays of this volume derive from an academic discourse between German and South African scholars that took place within the German-South African Year of Science 2012/13.
