It wasn't for any reason. Just out of no reason. I thought it would be fun if there is a lounge café in the free space between the twin towers, and if the café revolves as it moves vertically like an elevator. While the outside landscape is constantly changing and revolving, we listen to music over a cup of coffee, appreciate the interior decoration and props, and see the exterior scenery as if we were watching a panoramic movie. So how many birds can be caught on a stone? The title was originally called "the Elevator Café ." It was abbreviated as "the El Café ." Of course, "café " means coffee in French. However, in the meantime, I interchanged Café 's C and El's I into "the Eclafé ", which may give an exotic feeling, but finally decided to be "El DoraDo". This word implies everything that characterizes our café . The first word "El" means "Elevator", and the second part "Dora" means "turn" in Korean. Do(島), written in Chinese character, naturally means an island. We have to cross a bridge to get to this island. Our El DoraDo is also reminiscent of Spanish El Dorado, meaning "the golden place", and is often used to refer to a utopia. As "El" also means "The" in Spanish, we do not

add "The" to our El DoraDo. It is just "El DoraDo." To maximize El DoraDo's panoramic view, it must first be shaped like a flying saucer and have transparent walls all around. Going up as high as possible, we get a much wider panoramic view. Structurally independent El DoraDo, moving vertically and revolving, is decided to be built in the space between the tall twin buildings. Why? Because it's my own imagination. Rather, the space between most of the twin buildings in the world is free, which is advantageous in terms of space utilization, and it is structurally advantageous because the twin buildings can support El DoraDo. It would be less costly to be supported by separated buildings than to support El DoraDo by itself. The key is to find appropriate twin or triple buildings. Existing twin buildings have already completed structures for themselves, so adding El DoraDo between these buildings would be cumbersome because some or more of the existing structures must be modified for El DoraDo. Then, if we collaborate with someone or some company that wants to build twin buildings, we can put it in the original design. This book tells a story of building and running El DoraDo under this circumstance. It is assumed that El DoraDo is supported by twin or triple 50-story buildings. The buildings also supply electric power for El DoraDo to move up and down and for other power consumption. So let's board El DoraDo and have a cup of coffee there for over an hour. When will we ride it? There is no problem if we board before the departure of El DoraDo from the mother ship, from the shopping mall of the buildings. But can we ride El DoraDo while rising and revolving? It is of course possible. Now let's say our El DoraDo is at the level of the 40th floor of the supporting buildings. First, let's go to a nearby elevator in the shopping mall. There are many elevators belonging to the shopping mall and to the supporting buildings to carry us to El DoraDo. They are just ordinary elevators. However, the sides of the elevator facing toward El DoraDo are made of glass, so we can see if El DoraDo is nearby. The elevator ascends as fast as it hits, then stops on the nearest floor to the present level of El DoraDo. There we can get a transit lift that will guide us to the entrance to the bridge connecting to El DoraDo. Soon, the transit lift is separated from the high-speed elevator and docks with the gate to the bridge to El DoraDo. After crossing the connecting bridge, we enter El DoraDo. If the entire El DoraDo body is revolving, it may not be easy for us to board. To safely board in a revolving state, El DoraDo has dual ring-shaped decks, inner revolving one and outer non-revolving one, as shown in the cover figure.

1929 This book is written in the interest of those millions of people who suffer from incurable stomach trouble. The book tells that acidity is the main cause of stomach disease and gives instructions on how to make your stomach alkaline. Food chemist. Maxine Lamont is a passionate, independent woman with an unruly head of curly brown hair who believes in the power of love

and the excitement of change. With three thousand miles between them, Maxine and her ex have recently parted ways. Max, as she prefers to be called, has learned through life's circumstances to go it alone or so she thinks. Not always the leading lady of her life and sometimes her own worst enemy, Max moves ahead unaware of the priceless friendship she's about to discover. She meets Marjorie Talbot, a headstrong but lovable gallery owner, who helps her through a series of relationships from a hot, romantic lover; to a foreign stranger; to an accountant turned boat enthusiast. Max wonders over all the men in her life, but Marjorie keeps her sane through the proverbial girls night, during which they share wine and wisdom. As Max continues on her literal and spiritual journey of self-discovery, Marjorie is there to guide and show Max that, despite occasional heartbreak, every love we encounter is a gift that brings out something new and different in us, helping us to grow.

Coffee, as a commodity and through its global value chains, is the focus of much interest to achieve fair trade and equitable outcomes for producers, processors and consumers. It has iconic cultural and economic significance for Colombia, which is one of the world's major coffee producers for the global market. This book examines sustainable coffee production in Colombia, specifically the initiatives of Nestlé to create shared value. It describes the transformation of the coffee landscape by the development of economically, socially and environmentally viable and dedicated supply chains. Suppliers have been encouraged to shift production and quality paradigms, in order to develop long-term and sustainable strategies for higher value and premium quality products. This has been partially achieved by establishing a robust partnership with the Coffee Growers Federation and other public, private and social actors, thereby taking control of the institutional architecture and knowledge base that exists in the country. The book provides an important lesson of corporate social responsibility and the creation of shared value for the benefit of farmers, corporations and consumers.

When everything you've worked for is whipped away, would you have the heart to start over? Lena Hawkins has spent her every waking moment building her reputation as a top chef. When her cheating husband takes the credit and tosses her aside, she calls it quits for the sake of her son and returns to the country town where she grew up, thankful for the support of her close knit Italian family. Coerced by the local community she opens a restaurant in a disused dairy and starts over. Adam Chapman, one time Sydney lawyer now deer farmer, is more than happy to provide the premises and have an outlet for his produce. Little does he realize that they have unsavory connections. Old secrets are uncovered that rock the small town and drag them both into the world they thought they'd left behind them. Max and Paul are just trying to keep their architecture company afloat, but they accidentally hired the

mob as contractors to build a police retirement home. With the help of their dizzy secretary, Trixie, they may never get the project done in this screwball comedy, but they are most definitely building madness. Building Madness is a brand new 1930s screwball comedy penned by USA TODAY bestselling author and Maryland Distinguished Scholar in the Arts Kate Danley. Cast: 3m/3f Running Time: 90 minutes Appropriate for general audiences Search Terms: general audiences, clean comedy, funny roles for women, strong roles for women, full length play, funny, mafia mob, 1930s golden age, screwball comedy

In the five years since the first edition of this classic book was published, Internet use has exploded. The commercial world has rushed headlong into doing business on the Web, often without integrating sound security technologies and policies into their products and methods. The security risks--and the need to protect both business and personal data--have never been greater. We've updated Building Internet Firewalls to address these newer risks. What kinds of security threats does the Internet pose? Some, like password attacks and the exploiting of known security holes, have been around since the early days of networking. And others, like the distributed denial of service attacks that crippled Yahoo, E-Bay, and other major e-commerce sites in early 2000, are in current headlines. Firewalls, critical components of today's computer networks, effectively protect a system from most Internet security threats. They keep damage on one part of the network--such as eavesdropping, a worm program, or file damage--from spreading to the rest of the network. Without firewalls, network security problems can rage out of control, dragging more and more systems down. Like the bestselling and highly respected first edition, Building Internet Firewalls, 2nd Edition, is a practical and detailed step-by-step guide to designing and installing firewalls and configuring Internet services to work with a firewall. Much expanded to include Linux and Windows coverage, the second edition describes:

- Firewall technologies: packet filtering, proxying, network address translation, virtual private networks
- Architectures such as screening routers, dual-homed hosts, screened hosts, screened subnets, perimeter networks, internal firewalls
- Issues involved in a variety of new Internet services and protocols through a firewall
- Email and News
- Web services and scripting languages (e.g., HTTP, Java, JavaScript, ActiveX, RealAudio, RealVideo)
- File transfer and sharing services such as NFS, Samba
- Remote access services such as Telnet, the BSD "r" commands, SSH,
- BackOrifice
- 2000 Real-time conferencing services such as ICQ and talk
- Naming and directory services (e.g., DNS, NetBT, the Windows Browser)
- Authentication and auditing services (e.g., PAM, Kerberos, RADIUS);
- Administrative services (e.g., syslog, SNMP, SMS, RIP and other routing protocols, and ping and other network diagnostics)
- Intermediary protocols (e.g., RPC, SMB, CORBA, IIOP)

Database protocols (e.g., ODBC, JDBC, and protocols for Oracle, Sybase, and Microsoft SQL Server) The book's complete list of resources includes the location of many publicly available firewall construction tools. In the 1960s mahogany and luxurious veneers were being exported to the world from rain forests in Africa. One company operated in Liberia and a young man went out on contract to work on a pilot scheme. Later his family would join him and their experience of living in the Liberian bush, getting to know and love the people, would remain with them for the rest of their lives. The bush Liberians were poor, but they had something that singled them out, they had personality and many of them were the unforgettable characters that magazines talk about. These are the anecdotes and stories that were collected during the time spent in the bush. Some will make you laugh and others will make you cry, but it was essentially a happy time and you will enjoy the tales that are told. Professor Howard J. Wiarda, a leading academic expert on foreign policy, comparative politics, and international affairs, is the author of more than eighty books. Wiarda has traveled to many of the world's most troubled and exciting places. Now, in the more personal accounts of his global travels, he recalls his foreign research adventures, the countries visited, and the people he met and interviewed along the way. Wiarda's new four-volume set, *Exploring the World: Adventures of a Global Traveler*, details his travels and foreign adventures since 2006. In these travel books, he tells the stories that lie behind the research, offers his impressions of the countries and regions he has explored, and considers how and why some have been successful and others not. Volume I in this new series tells the story of Wiarda's 2010 circumnavigation of the globe. Volume II focuses on Europe and the continued importance of European regionalism—despite the bumper stickers advertising "Europe Whole and Free." Volume III deals with Latin America and questions whether the region is really as democratic as we would like it to be. Volume IV provides Wiarda's analysis of Asia's economic miracles while also recounting his recent visits to the Persian Gulf and his assessment of modernization and development in the Islamic world. Insightful and entertaining, Wiarda's travel narratives offer commentary on important and interesting sites all over the world. The best man in the world wanted to marry her But she couldn't say yes...yet! Most girls dreamed of the day someone offered them a ring. Not Connie Greene. She couldn't even open the box. She did care for Ben Carruthers—always had, always would. But she couldn't marry him until she'd made amends for the wrongs she'd committed. Until then, she had to protect Ben from himself. And most important, from her. Anyone Can Do It chronicles the start and evolution of a successful business dream. Beginning with the Hashemi siblings' first conversations (when the seed of the idea was planted) it follows the

progress of Coffee Republic from business plan to the present day. Coffee Republic is now worth around £50m with 90 outlets around the UK. This is a start-up business book for real people. Sahar and Bobby take the reader step by step through every aspect of starting and growing a business from asking 'why?' and writing the plan to hiring staff and letting go. The book is illustrated throughout with inspirational anecdotes from their own experience. It is a very personal story of dreaming, acting and succeeding offering a myriad of lessons for aspiring entrepreneurs and blowing apart the myth that only 'special' people start successful businesses. On or about the 6th of April 2010, the Icelandic volcano known as Eyjafjallajökull began quietly churning and four days later, in an act of super-human magnanimity, Europe's governments opted en masse to close their air space indefinitely, marking the most-massive interruption to routine transportation in sixty five years and more poignantly, approximating the first time its many leaders had acted in unison against a common enemy, no less so quickly. Roughly 100,000 travelers were stranded, including you guessed it, us. Never has a plume of volcanic ash so punched above its weight, but when scientific expert after instant expert was paraded before TV 24 News, the universal response was "we just don't know." This is the story of near-freaking in the face of adversity and throwing caution to the wind, and getting back home by train, plane and virtually every other mode of transportation except pantomime circus elephant, while fighting against the Big Machine at every opportunity, mixed metaphors and all. Life is too short to just come in for the paycheque. Let's face it, you work for the best years of your life and spend most of your waking hours on the job, so make sure you are energized, fulfilled and buzzing. Switched On will help you leap outside your comfort zone and awaken your creativity. Blast through the old thinking Switched On shows you how to think like an entrepreneur - have ideas, spot the opportunities, see the future and make things happen. The future belongs to fresh thinkers, so turn your receptors on and get ready to bring the real you to work. They'll love you for it. Go on, unleash yourself - you'll be surprised at how indispensable you become. You have it in you - you just need to switch it on. 'Not all of us can be great entrepreneurs but all of us can be innovative and enterprising in whatever role we perform. This book is a great guide and an inspiration on how to achieve this' Miles Templeman, Director General, Institute of Directors. CD-ROM contains: Examples from text -- Parser toolkit -- Example programs. Book 2 in a series. dalewj is a real avatar in a real MMORPG game called AfterWorld. Watch dalewj change from a newcomer to a full grown citizen. In his journey he will meet new friends, battle with old friends and again deal with death. dalewj will also create the first known history of the world he lives in. It is not a question if dalewj can survive...it is more important

question if the AfterWorld survives. This book will help small business owners and marketers feel comfortable using social media to promote their businesses, regardless of their past experiences or level of expertise. • Interviews with 25 small business owners and marketers detailing how they are using social media successfully right now • An evaluation tool and example spreadsheets for conducting a social media audit • Call-outs that show how different types of businesses can implement various marketing ideas • Action-item tips that can be used in online messaging today

Climate change, technology, and regulation are just some of the challenges faced by the architecture, engineering and construction industry in the design and build of modern buildings. This book explores these trends, highlighting how higher education and the construction sector can address these challenges through modern design practices and integrated approaches. It explores the following topics: conflicting design tensions in projects; the concept of Defornocere ('ugly through harm'); the emerging role of the design manager; buildings and their impact on health and wellbeing, and the importance of information modelling for enhanced design. Energy modelling and life-cycle analysis along with multidisciplinary building design and design trade-offs are covered too. With case studies and supporting illustrations this book will guide you to a better understanding of modern building design. During his many years as a senior executive at Starbucks, Howard Behar helped establish the Starbucks culture, which stresses people over profits. He coached hundreds of leaders at every level and helped the company grow into a world-renowned brand. Now he reveals the ten principles that guided his leadership-and not one of them is about coffee. Behar shows that if you think of your staff as people (not labor costs) they will achieve amazing results. He discusses the importance of building trust, telling hard truths, thinking independently, and more. And he shares inside stories of key turning points for Starbucks, as it fought to hang on to its culture while growing exponentially.

"The story takes off faster than a speeding bullet!

"

From USA Today Bestselling

Author AR Shaw!

Get the 3-Book Series in one Box Set!

Includes: Book 1, Unbound Book 2, Undone Book 3, Unbeaten With the aid of a canine brigade, can a charade keep the apocalypse away? Sloane Delaney struggles to keep her daughters safe in an apocalyptic dawn. Aided by a pack of abandoned dogs, they maintain a dangerous charade to keep looters at bay. But then, corrupt agents arrive, threatening their hard-won sense of security. Fleeing for a safe haven, Sloane doesn't count on trusting a stranger.

"I read everything by this author, love her style of writing, realistic characters and storyline. This book was no exception showing

both the good and kindness in people but also the darker side of humans."

"It's always nice when you open up a book from an author you really love. It's such an easy decision knowing it will be an outstanding read. Shaw has become a leader among the PA genre. You will not be disappointed. Just buy it. Now. "

"I like this author's style.

She drew you into the story right from the beginning with the fear Sloan and her girls are going through." Start the journey. Get your copy today! TRIZ is a brilliant toolkit for nurturing engineering creativity and innovation. This accessible, colourful and practical guide has been developed from problem-solving workshops run by Oxford Creativity, one of the world's top TRIZ training organizations started by Gadd in 1998. Gadd has successfully introduced TRIZ to many major organisations such as Airbus, Sellafeld Sites, Saint-Gobain, DCA, Doosan Babcock, Kraft, Qinetiq, Trelleborg, Rolls Royce and BAE Systems, working on diverse major projects including next generation submarines, chocolate packaging, nuclear clean-up, sustainability and cost reduction. Engineering companies are increasingly recognising and acting upon the need to encourage successful, practical and systematic innovation at every stage of the engineering process including product development and design. TRIZ enables greater clarity of thought and taps into the creativity innate in all of us, transforming random, ineffective brainstorming into targeted, audited, creative sessions focussed on the problem at hand and unlocking the engineers' knowledge and genius to identify all the relevant solutions. For good design engineers and technical directors across all industries, as well as students of engineering, entrepreneurship and innovation, TRIZ for Engineers will help unlock and realise the potential of TRIZ. The individual tools are straightforward, the problem-solving process is systematic and repeatable, and the results will speak for themselves. This highly innovative book: Satisfies the need for concise, clearly presented information together with practical advice on TRIZ and problem solving algorithms Employs explanatory techniques, processes and examples that have been used to train thousands of engineers to use TRIZ successfully Contains real, relevant and recent case studies from major blue chip companies Is illustrated throughout with specially commissioned full-colour cartoons that illustrate the various concepts and techniques and bring the theory to life Turns good engineers into great engineers. The Beginner's Guide to Hand Building is a friendly, contemporary take on the classic hand-building book—perfect for new and returning ceramic artists. Culture is a game changer. In It Takes More than Casual Fridays and Free Coffee , Adams includes stories and practical advice as well as related exercises and assessments to help you identify company and personal strengths and weaknesses. This book is your front-row seat to building

and perpetuating a successful culture in any business. This book presents a comparative analysis of seven case studies that challenge some of the current beliefs about good practice in the provision of business development services (BDS) to small and micro enterprises. It also highlights issues around the assessment of impact, sustainability, and cost-effectiveness of such services. Three services were given particular attention in the case studies: marketing, access to technology, and business and management skills acquisition. The case study projects were drawn from Bolivia, Bangladesh, El Salvador, Ghana, Sri Lanka, and Zimbabwe. Each of the projects introduced small producers to new production and marketing systems and successfully promoted private sector participation. The analysis of these experiences looks at the feasibility of market-based BDS provision and the role of nongovernmental organizations in building BDS markets. The research discussed here makes an important contribution to the ongoing debate regarding market and demand based provision of nonfinancial services to existing and potential small and micro entrepreneurs and businesses in the Southern countries. This debate has been influenced by the success to date in standardizing and commercializing micro-credit programs. This book argues that to reach and assist small producers, BDS often need to be designed and provided in a multifaceted and flexible manner. This practical guide shows you how to build your own software tools for customizing the GitHub workflow. Each hands-on chapter is a compelling story that walks you through the tradeoffs and considerations for building applications on top of various GitHub technologies.
