With the release of UFT API testing, I felt most people who were new to the product would be looking for a resource to help get them up to speed quickly. Also, I believe that with the industry-wide adoption of Agile's development process, the need for test automation engineers to understand and be able to create API level test has become critical. This book is what I wished I had when I first began using UFT API testing. I'm adopting a "hands-on" approach, and have tried to include practical examples and pithy explanations for all the concepts presented. This is not meant to be an exhaustive look at every aspect of UFT API but rather to serve as a quick-start

Extensibility and much more... Mit der Version 7.1 erweitert SAP den SAP Solution Manager mit einigen Funktionen in den Bereichen Testmanagement und Testautomatisierung. Besonders interessant sind die Testwerkzeuge der Testautomatisierung, da das SAP-eigene Testautomatisierungs-Tool eCATT die neuen SAP-Benutzeroberflächen mit unterschiedlichen Technologien nicht unterstützt und somit für das Testen von Geschäftsprozessen nicht geeignet ist. Um diese Lücke zu schließen, wurden verschiedene Drittanwendungen integriert. In diesem Buch wird auf die Möglichkeiten der Testautomatisierung, die sich durch das Upgrade im SAP Solution Manager 7.1 ergeben, eingegangen. Hierzu werden die Werkzeuge eCATT und HP QTP (Drittanwendung) ausführlich untersucht und deren Stärken und Schwächen in der Automatisierung von technologieübergreifenden Geschäftsprozessen aufgezeigt. Die Europäische Union ist zu einem eigenständigen politischen System geworden, dessen Entscheidungen immer deutlicher die Innenpolitik der Nationalstaaten beeinflusst. Mit dieser Entwicklung rücken zunehmend auch Fragen nach Demokratie, Identität und Kontrolle dieses politischen Systems in den Vordergrund. Die Wissenschaft hat dazu verschiedene normative Modelle europäischer Öffentlichkeit formuliert, mit unterschiedlichen Implikationen. Diese übergreifende Diskussion verdeutlicht den Stand der Entwicklung, die Hindernisse, die es zu überwinden gilt, aber auch

Grenzen die kurz- und mittelfristig nicht veränderbar sein werden. Von wachsendem Interesse ist auch der Beitrag, den Akteure, nicht nur auf politischer Seite, sondern auch auf Seiten der Medien für eine europäische Diskussion leisten. Im Puzzlespiel der vielen verschiedenen Akteure, die an der Konstitution einer europäischen Öffentlichkeit beteiligt sind, spielen die Journalisten in Brüssel sicher eine herausragende Rolle. Die allgemeine Debatte um eine europäische Öffentlichkeit ist Voraussetzung, um in die tiefergehende Problematik des Brüsseler Pressecorps einzusteigen. Die besondere Position der Brüsseler Journalisten resultiert aus ihrer Vermittlungsleistung zwischen Nationalstaat und Europäischen Institutionen. Doch angesichts des vielbeklagten Öffentlichkeitsdefizits und empirischen Hinweisen auf eine magere Berichterstattung über Europa ist fraglich, ob sie ihrer Aufgabe gewachsen sind. Ziel dieser Arbeit soll es daher sein, die normativen Grundlagen journalistischer Arbeit in Brüssel herauszuarbeiten, sie in Beziehung zu den empirischen Gegebenheiten zu setzen und eine mögliche Ursache des Öffentlichkeitsdefizits zu bestimmen. Dazu werden folgende Fragen zu beantworten sein: Wie sind die Arbeitsbedingungen der Brüsseler Journalisten, welches Selbstverständnis haben sie, welche Quellen nutzen sie? Wie sieht die Berichterstattung

über europäische Themen aus und lässt sich ein Zusammenhang zu der journalistischen Arbeitsweise herstellen? Und welche Schlußfolgerungen lassen sich daraus für die Entstehung einer Europäischen Öffentlichkeit ziehen? Are You Interested in QTP/UFT? Automated arbitrage trading is aimed at computerizing arbitrage opportunities that exist in the stock market using Quick Test Professional (QTP). The developed software aims at obtaining a low cost model for arbitrage trading. The program makes price comparisons of 25 to 30 stocks every 30 seconds, which has a great advantage over manual arbitrage trading. The automated arbitrage trading developed in this thesis uses QTP and does not need any human intervention. It helps small traders take advantage of arbitrage opportunities that exist in different price segments of the stock market. The QTP tool compares prices of cash and future segments of the listed stocks to check if there is any arbitrage trading opportunity. It also

checks prices of some pre-selected securities against preset conditions to determine if any of the securities pass the test. If the condition is satisfied, QTP initiates buying/selling on the arbitrage opportunity and thus helps make profit on the transaction. It uses Odin Diet trading platform to get updated price feeds of the securities. This procedure is executed after every 30 seconds by QTP.
